The World

The world of Tales Untold is one of magic and adventure, where the once united lands of Albion have been torn asunder by the [fall of Camelot](#). Now known as the Hundred Realms, war, bandits and dragons ravage the land while rulers are left to fend for them themselves for the first time in 50 years. Here Monarchs rule with iron fists or loving care, peasants start great journeys to become legends and sorcerers hone their ever advancing skills to aid either allies or curse their foes. A hundred realms, a thousand possibilities. Who knows how your story will go?
